Honorable Debbie-Anne A. Reese, Secretary
Federal Energy Regulatory Commission
888 First Street, NE
Washington, DC 20426

RE: CP25-528-000, Eastern Gas Transmission & Storage, Inc. Appalachian Reliability Project

Dear Secretary Reese,

As a local government committed to supporting sustainable growth and economic development, the Municipality of Murrysville recognizes the vital role that energy infrastructure plays in powering our region and supporting our communities.

We have observed firsthand the economic benefits that responsible natural gas development has brought to Pennsylvania and the broader Appalachian region. The growth in energy-related infrastructure, including projects by companies like Eastern Gas Transmission and Storage, Inc. (BHE GT&S), contributes significantly to local economies, creates jobs, and enhances the reliability of energy services.

Through the proposed Appalachian Reliability Project, BHE GT&S aims to meet the growing energy demands of customers across the region. The project will expand the existing system by leveraging current infrastructure and adding new pipeline segments and station upgrades.

In light of the project's potential to strengthen regional energy infrastructure, support economic development, and enhance system reliability, the Municipality of Murrysville offers its full support for the Appalachian Reliability Project. We recognize the value of this investment not only for our local community but also for the broader region, as it addresses critical energy needs while upholding strong commitments to safety and environmental stewardship.

We respectfully urge the Commission to approve this important infrastructure upgrade.

Sincerely,

Michael L. Nestico
