The Honorable Debbie-Anne A. Reese, Secretary
Federal Energy Regulatory Commission
888 First Street, NE Washington, DC 20426

RE: Docket No. CP25-528-000, Eastern Gas Transmission & Storage, Inc. Appalachian Reliability Project

Dear Secretary Reese:

In my capacity as both Pennsylvania State Senator for the 39th District and President Pro Tempore of the Pennsylvania Senate, I write to express my support for the Eastern Gas Transmission and Storage's (EGTS) application to the Federal Regulatory Commission (FERC) for its Appalachian Reliability Project.

Eastern Gas Transmission and Storage seeks to add energy capacity to the Appalachian region by upgrading strategic stations and extending targeted pipeline. The project will create 500,000 dekatherms/day of incremental firm transportation capacity. Three of these projects are located within the City of Murrysville and Salem Township, both of which are part of the 39th Senate District.

Pennsylvania's energy sector is continuously adapting to the changing dynamics surrounding reliability and capacity for both commercial and residential consumers. Eastern Gas Transmission and Storage's Appalachian Reliability Project is another advancement in meeting our growing needs.

I sincerely hope that you look favorable on this application. If you have any questions, please do not hesitate to contact me. Thank you for your consideration.

Sincerely,

Senator Kim Ward
President Pro Tempore
